

UPGRADE POLICY

Considering the changes in science and computers, it is possible to upgrade from an older device to a newer device. Here is a guideline to follow if you wish to upgrade your device.

1. Contact your Broker or Networker and inform them of your interest. They can tell you more about their policies and assistance in the upgrade procedure.
2. Your older device must be returned to the Budapest Home Office **before** we will release a new device to you. If you have constant communication with your Broker or Networker and they in turn are in constant communication with Edit Barota, Supervisor of Upgrades at the Budapest Home Office, then the turn-around time can be reduced to just a few days.
3. The price to upgrade an older device is as follows:
 - a. Serial operative SCIO to a USB operative SCIO = 4,500 EUR
 - b. QXCI to USB operative SCIO = 10,000 EUR
4. After the funds have been received and your older device is on the way to Budapest (we accept a trackable shipping number as confirmation) then we are able to send your upgrade to you. However, please ensure with your Broker that there is a device in Budapest ready to ship to you **before** shipping your older device to the Budapest Home Office.
5. An upgrade must be completed online. Please contact your Broker or Networker to begin this process.

If you have further questions, please contact your Broker or Networker.
